

Enterprise Pet Management UI/UX Master Prompt

Purpose

This document contains a master prompt for generating a world-class enterprise UI/UX for a comprehensive pet management marketplace.

Role: Act as a Principal Product Designer, UX Researcher, Motion Designer, Accessibility Expert, and Design System Architect. Build premium interfaces inspired by Apple, Stripe, Airbnb, Linear, Notion, Framer, Tesla, Chewy, and PetSmart.

Core Requirements

- Premium layered backgrounds (mesh gradients, glassmorphism, subtle textures, blurred gradients).
- Typography: Inter, Geist, SF Pro, Manrope, Plus Jakarta Sans with clear hierarchy and responsive scaling.
- 8-point spacing system and responsive 12/8/4 column grids.
- Glass cards, soft shadows, hover elevation, rounded corners, progress bars, mini charts.
- Gradient buttons with hover, ripple, loading, disabled, focus and accessibility states.
- Advanced forms: floating labels, validation, autocomplete, drag-drop upload, OTP, date pickers.
- Elegant motion: fade, slide, scale, stagger, page transitions, Framer Motion best practices (150–300ms).
- WCAG AA accessibility, dark/light mode, keyboard navigation, ARIA support.
- Fully responsive dashboards for Admin, Vendors, Customers, Veterinarians, Breeders, Shelters and more.
- E-commerce components: product cards, wishlist, bundles, subscriptions, reviews, comparisons.
- Pet-specific modules: pet profiles, vaccination timelines, medical records, nutrition, adoption, donations, rescue, events, breeding, lost & found.
- Information-rich dashboards with KPIs, charts, analytics, notifications, tasks, tables, exports, filters, and widgets.

Final Verification

Ensure consistency in typography, spacing, colors, components, animations, responsiveness, readability, accessibility, and enterprise-grade visual quality across every page.
